

## Summary

**The Cover Story Section** of this Pharmaceutical Industry Review # 6 (29) 2011 contains a number of articles, including: on Good Engineering Practice approach as a system tool for engineering management; the results of Facility of the Year award for 2011; modern solutions for the projects of developing pharmaceutical and biopharmaceutical facilities (the feedback from MW Process Industries based on its projects in Russian Federation), and a breakthrough insulation solution for tubing in clean and sterile environments, designed by Zotefoams plc.

**The Events Section Special Report** presents CPhI Worldwide-2011 (25–27 October, Frankfurt) in details, including interviews with participating companies, such as Farmak and Interkhim of Ukraine, Roquette (France), BASF international group and some other. This Section includes special reports on Bago Company of Argentina and CEMO Corporate of Spain, and on their representative and promotor in the CIS countries – BC Pharma B.V. The Roquette Company finalises this Section with a detailed report on KLEPTOSE®

native and modified cyclodextrins in application to molecular encapsulation.

**The Equipment Section** presents, among other, reliable solution for all requirements of sterile products suggested by Marchesini Group. In a separate article Bonfiglioli Engineering elaborates on its competitive advantages as guarantees for its customers' success.

**Expert's view on global approach to fighting the counterfeit pharmaceutical products is in the Technology Section** of this Pharmaceutical Industry Review publication. The same section includes an article prepared by Chief Engineer of Watertown Company on some special features how to design systems that produce, store and distribute water for injections.

**Contract manufacturing** segment of pharmaceutical market of Ukraine is analysed in details in a specially designated section.

**Analytical Control section** continues publishing articles on various aspects of sampling and samples processing as a key component of quality control (for the beginning, see Pharmaceutical Industry Review # 4 (27) 2011). As well, this section includes articles on the significance of sizing of particles in pharmaceutical production process; on the new SHIMADZU equipment for pharmaceutical sector; on validation of the cleaning process for processing

equipment; and on mapping of API and excipients within tablets by means of Raman spectroscopy.

**The Events Section** covers PHARMTECH-2011 exhibition (22–25 November, Moscow), the 20th anniversary of HEALTHCARE-2011 exhibition (11–14 October, Kyiv), Adam Smith Ukrainian Pharmaceutical Forum (17–19 October, Kyiv), and Adam Smith Pharma Forum (21–22 November, Moscow) that was dedicated to innovations and new drugs development in Russian Federation.

**O**n the concluding pages of this Pharmaceutical Industry Review publication historian Vitaly Kovalynsky vividly describes «adventures» in private life and professional activities of some drug store holder's family in Kyiv in the 19<sup>th</sup> century. ■
